Lab - Traceroute

Traceroute to one server located in the USA or Japan (for example, www.example.com) and answer the following questions:

1. Copy and paste the output.

2. How many routers are there between your computer and the server?

3. List the cities that your message was routed through
   (you can use https://www.iplocation.net/ to find the location of an IP address)

4. Was there any link that could have queuing delay?

5. Submit your answer to moodle.
