CS333, Spring 2020

Lab 8: Packet Tracer Lab #1: Initializing a small network

From the zip file, located in your lab section, "PT_Lab_#1_Materials", do the following exercises:

--**Part A**: do a Packet Tracer 2.2.3.3 (Configuring Initial Switch Settings) (10% of the lab grade)

--**Part B**: do a Packet Tracer 2.3.2.5 (Implementing Basic Connectivity) (10% of the lab grade)

--**Part C**: do a Packet Tracer 2.4.1.2 (Skills Integration Challenge) (10% of the lab grade)

As you finish doing a PT file, save it and recheck it. When you open it again, the **completion** bar in the **PT activity** window (right bottom) should show maximum.

From moodle download and finish the pka file:

--**Part D**: Lab_8-PT_Lab_#1_Part_D.pka (70% of the lab grade)

If you submit only the file from **Part D,** without first 3 files, your lab grade **at max** will be **50%**.
